TOC – Total Organic Carbon (wt.%);  $T_{max}$  – temperature of maximum of S<sub>2</sub> peak (°C); S<sub>1</sub> – free hydrocarbons (mg HC/g rock); S<sub>2</sub> – residual hydrocarbons (mg HC/g rock); S<sub>3</sub> – CO<sub>2</sub> released during decomposition of organic matter (mg CO<sub>2</sub>/g rock); PI – Production Index = S<sub>1</sub>/(S<sub>1</sub>+S<sub>2</sub>); HI – Hydrogen Index (mg HC/g TOC); OI – Oxygen Index (mg CO<sub>2</sub>/g TOC); MINC – mineral carbon (wt.%); n.a. – not applicable; n.c. – not calculated;  $T_{max}$  values written in italic may be misleading (see remarks)
